# Dear customer

## Thank you for choosing RIB Cable Organizer

RIB Cable Organizer is a functional and smart cable hanger. It easily hides all cables efficiently under the desktop. The cable hanger fits all tables. The advantage of RIB Cable Organizer is that you can choose where you want to place and mount the three rails under the table. This makes the cable hanger more flexible than most other similar products on the market. You also get a neat and beneficial gap between the cables and the devices that the cables come from under the desk. RIB Cable Organizer also handles power strips. In most cases, you do not need an additional cable basket. The hooks are made of polypropylene plastic. The plastic material is very elastic and can withstand a load of 1 kilo. Easily mounted with double-sided tape. RIB Cable Organizer contains 3 x 38 cm. long rails with 6 pcs. hooks per. rail. Each rail has tape on the underside which makes installation easier. Screws for final assembly are also included in the kit. 3 pcs. screws per rail.

# Installation step - how to mount RIB Cable Organizer

1

## Step 1

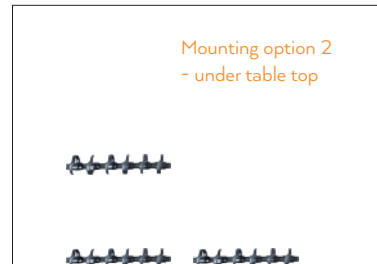

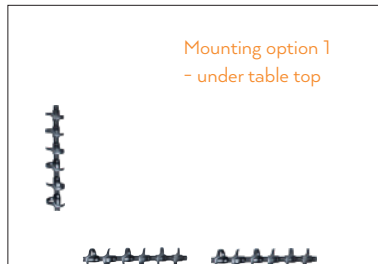

Remove the protective film from the tape on the underside of each of the three RIB rails.

2

## Step 2

Place all three RIB rails in a suitable place under the table by pressing the tape against the tabletop. There is no requirement for correct placement during installation. If the tabletop is long, it may be appropriate to make a longer guideway for cables by mounting the RIB rails in line one after the other. If there are many cables and / or long cables, it may be appropriate to mount 2 pcs. or several RIB rails in parallel next to each other. Mounting option 1 or 2. See images

# 3

## Step 3

When all three RIB rails are attached in the desired place under the tabletop, use the supplied screws for final mounting with a screwdriver or drill.

# 4

## Step 4

Now you can easily run the cables in a zigzag motion between each hook on the RIB rails. Power strips can also be easily placed under the table.
